### 15KV Composite Deadend Insulator

**Type:** 15KV composite deadend insulator

**Material:** Hard-wearing HTV silicone rubber

**End Fittings:** Hot-dip galvanized forged steel materials for end fittings give good performance on erosion

**Specific mechanical failing load:** 70kN.

**Application:** 15KV composite deadend insulator made of a fiberglass-reinforced resin matrix core, polymer material weathersheds and metal end fittings intended for use on overhead lines for electric power systems, 69 kV and below. Mechanical and electrical performance levels specified are requirements for 15KV composite deadend insulators. As a composite insulator manufacturer, we manufacture high quality and reasonable price 15KV composite deadend insulator.

#### Technical data:

|  |             |    |
|--|-------------|----|
| Rated voltage                          | 15          | kV |
| Section length                         | 322         | mm |
| Creepage distance                      | 384         | mm |
| Dry arcing distance                    | 193         | mm |
| Specific mechanical failing load       | 70          | kN |
| Power frequency dryt flashover voltage | 100         | kV |
| Power frequency wet flashover voltage  | 70          | kV |
| Lightning impulse withstand voltage    | 230         | kV |
| Color                                  | Grey or red |    |
| Package                                | Carton      |    |
